Location data cleanup: review before rollout

Assessment complete. Proposed corrections are prepared; business review and sandbox validation remain.

RECORDS ASSESSED
91,306
Four location objects

KEEP AS IS
52,419
57.4% match verified records

CHANGES PROPOSED
11,700
8,595 updates + 3,105 duplicate mappings

REVIEW REQUIRED
27,187
29.8% need further resolution

Disposition of all assessed records

Keep 57.4% | Update proposals 9.4% | Duplicate mappings 3.4% | Review 29.8%

Proposed action by object

Object	Keep	Update	Duplicate	Review
Provinsi	38	0	0	0
Kota / Kabupaten	54	458	311	67
Kecamatan	6,081	608	158	981
Kelurahan	**46,246**	**7,529**	**2,636**	**26,139**

Each source record appears in exactly one category.

MANAGEMENT PRIORITY

96.1%

of the review backlog is Kelurahan.

11,181 conflicting parent links

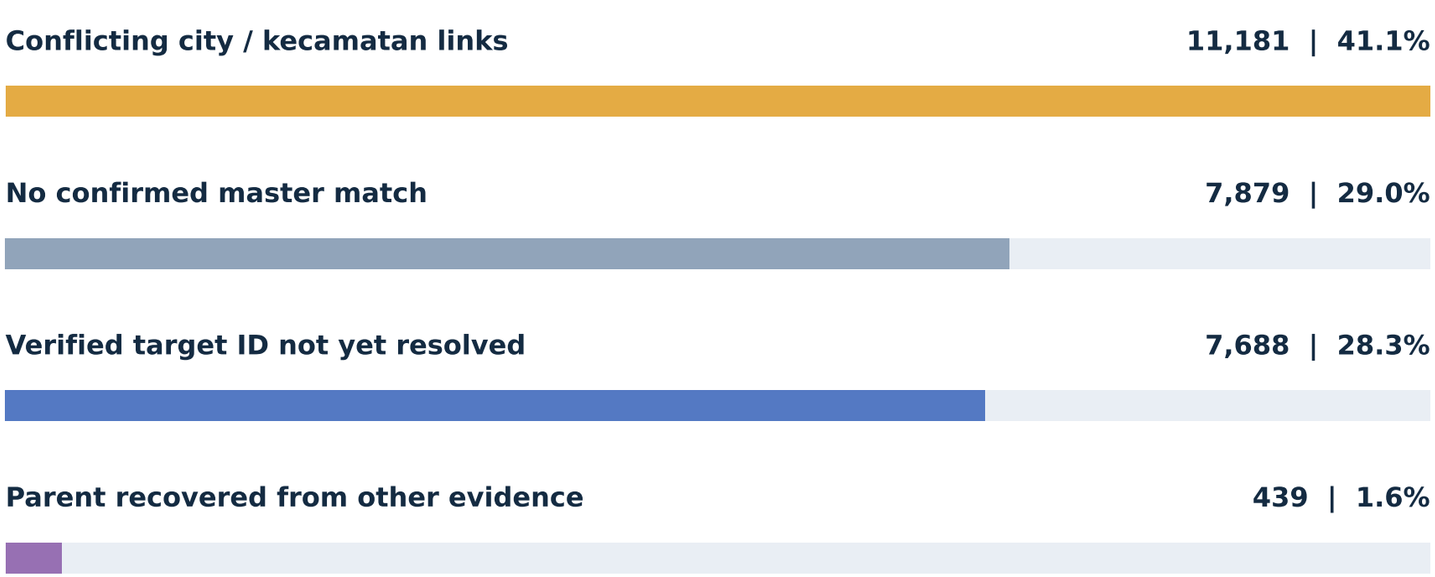
Resolve city vs. kecamatan relationships before approving changes.

NEXT DECISION

Assign data owners → **Approve reviewed mappings in sandbox** → **Then phase the rollout**

Clear the review backlog in four workstreams

27,187 records need additional resolution. Counts are mutually exclusive; proposed changes remain unapproved.



Review-only cases are excluded from the proposed update files.

DECISIONS & OWNERSHIP

01 Business data owners

Confirm the correct province, city, kecamatan and kelurahan relationships.

02 Salesforce administrator

Validate target IDs and every reference before retiring duplicate records.

03 Change approver

Approve a sandbox pilot, then authorize a controlled production rollout.

IMPLEMENTATION SEQUENCE

1 Resolve review cases

Start with Kelurahan parent conflicts.

2 Validate in sandbox

Test approved updates and references.

3 Roll out in dependency order

Province → City → Kecamatan → Kelurahan

Current state: analysis and review package prepared. No Salesforce records have been updated or deleted.
